We, at **ALL POINTS FASTENERS** have specialized in the industrial fastener industry for over 25 years.

We specialize in hex washer head self piercing and self drilling sheet metal screws. The self piercing screws are available in steel zinc plated, steel ceramic coated white (1000 hour salt spray tested), 410 stainless steel and copper plated 410 stainless steel.

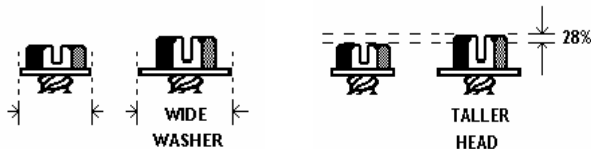

We offer a full range of competitively priced screws, painted screws, painted rivets, drill bits, recip blades (sawzall blades), socket drivers, cable ties, wire connectors, electrical tape and a variety of anchoring fasteners.

We also specialize in the **CUSTOM PAINTING OF FASTENERS:**

- We paint the heads of screws using an industrial grade primer and polyurethane enamel which is flexible, durable and acts as a rust inhibitor.
- We stock 6 x 3/8" and 8 x 1/2" zinc plated hex washer head self piercing screws in over 80 colors.
- We also stock other sizes of self piercing sheet metal screws and self drilling screws with painted heads in the popular colors. Please call to check availability.
- If we do not have stock of a particular color in any screw, we can have it painted within 14 days. Minimum quantities and charges may apply if it is not one of our regularly stocked colors.
- We welcome our customers to send us their color samples, so that we may find the best match from our existing colors or match your sample.

SELF-PIERCING SHEET METAL SCREWS

Superior Design

* Our #10 screws are available with 1/4" heads that are 28% taller than standard #10 screws and they also have a #10 washer under the head instead of the standard #8 washer. This helps to ensure no slip out, greater tool engagement and increased tool life.
